Verification status

DNS Belgium endeavors to verify the details of the holder of all .be domain names.

You can find the verification status for each .be domain name via this page https://www.dnsbelgium.be/fr/verification

In the case of the registration of a new .be domain name, the owner's information may be verified by DNS Belgium. In this case your domain will be "in progress" of verification.

Image not found or type unknown

One of the processes to validate the status of the domain is to confirm the registration of the domain by email. DNS Belgium sends an email to the domain owner box with a URL to be validated.

The email can be re-sent via the url: https://www.dnsbelgium.be/fr/verification

Please check your spam carefully.

Not verified
We have not yet verified the registrant details for this domain name, as we believe they are correct. If the Registrant subsequently registers a new domain name with the same details, we may verify the details.

In progress

The data of the holder of the domain name seem to us to be incomplete or possibly incorrect. Are you the domain name holder? We asked you to prove your identity. In the meantime, we have given the domain name the status "in progress". It is also possible that you have several domain names in progress if you registered them with the same details.

Checked
Registrant information is verified and correct for this domain name and possibly for other domain names registered at the same time.
